

# EVAN EARLE

Full Stack Web Developer

## SUMMARY

Driven, detail-oriented, problem solver with a well rounded set of skills across diverse industries. Equipped with years of web development and project management experience, I am seeking a tech company to hone my skills as a developer and contribute in a meaningful way.

## WORK EXPERIENCE

### Web Dev Mentorship/Specialist Banking Services | ADP Canada, Halifax, NS

2022 — Present

- Collaborated with a team of developers to build and test company wide internal web application for International Money Movement in conjunction with main duties with the banking department
- Created and maintained Angular components connected to the Java API and SQL database
- Worked with a senior developer to deliver PWRs (project work requests) from various departments

### Business Analyst/QA Lead | Content Bloom Inc, Halifax, NS

2015 — 2017

- Participated in requirement gathering workshops abroad and maintaining client relationships
- Collaborated with developers and oversaw SDLC of SaaS project as scrum master
- Led quality assurance team on major web development project executing test cases and evaluating product code while adhering to the Scrum methodology
- Completed content entry at the request of clients using HTML/CSS through a CMS

### Senior Accountant | Northview Consulting Inc, Halifax, NS

2020 — 2022

- Provided various accounting services for major international clients
- Responsible for training new staff on accounting processes and procedures

### Staff Accountant | Baker Tilly, Windsor, ON

2018 — 2020

- Prepared financial statements and tax returns for wide range of businesses
- Completed financial audits for clients on site

## Recent Projects:

[SoundBloom \(Fullstack Web App\)](#) – Users can login and search their favourite artists and view their top tracks and albums/singles as well as similar artists. Tracks are played through the Youtube player. Tracks can be favourited and viewed in a favourites playlist. Users can edit their profile name/password and upload a photo.

[WeatherCheck \(Fullstack Web App\)](#) – Users can create a profile and login to view the current and five day forecast of any city in the world. Users can set a home city as well as three favourite cities to fetch weather from.

[TaskEase \(Fullstack Web App\)](#) – Users can login to their profile and find their secure list of notes. Notes can be added, deleted, or checked completed.
